-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 November 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 34-63 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 34-63 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed 06/27/2007 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each NPL listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 34, 35, 38-45, 47-50, 52-55 and 58-63 are rejected under 35 U.S.C. 102(e) as being anticipated by Hakozaiki (US 6,234,845).

Hakozaiki discloses a card connector comprising a connector housing (30) having an upper wall (bottom of Fig. 1) and side leg portions (at 33, 34) adjacent to both ends of the upper wall, each side leg portion including first (at 33, 34) and second side walls and a step-like lower wall formed between the first and second side walls, a base plate (top in Fig. 1) adjacent to the leg portion, the base plate being opposite the upper wall,

contact terminals (37) arranged on the base plate, at an interval capable of accommodating a portion wall of the cards (see Response to Arguments), to electrically couple with the contact pads arranged on the first and second cards; a first space defined by the upper wall, the first side walls, and the lower walls to hold side edge portions of the upper body portion of the first card and the body portion of the second card and to accommodate the upper body portion of the first card and the body portion of the second card; and a second space defined by the second side walls, the second space being between the first space and the base plate (as seen from the front in a vertical direction, see Fig. 3), wherein no portion of the base plate extends into the second space. Please note that recitations of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Regarding claims 35, 45 and 55, Hakozaiki discloses the second sidewalls of the side leg portions can guide the side surfaces of a lower body portion of a first card.

Regarding claims 38, 39, 42, 43, 48, 49, 52, 53, 58, 59, 62 and 63, Hakozaiki discloses the upper walls of the guide grooves being formed with an opening / a recess having a width larger than a lower body portion of a first card, i.e. a least the same size as the separation between the side walls.

Regarding claims 40, 41, 44, 47, 50, 60 and 61, please note that at least one of the terminals work as a braking piece.

Regarding claim 51, Hakozaiki discloses the braking piece secure to a position which is far part of the guide groove.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 36, 37, 46, 56 and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hakozaiki in view of Horie (US 6,231,360).

Hakozaiki discloses substantially the claimed invention except for the eject mechanism. Horie teaches a card connector having an ejector mechanism (11) to help withdraw a card from the socket. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to from the card connector of

Asakawa having an ejector mechanism, as taught by Horie, to help withdraw a card from the socket.

Regarding claims 37 and 57, Hakoziaki discloses the braking piece secure to a position which is far part of the guide groove.

Response to Arguments

Applicant's arguments filed 11/05/2007 have been fully considered but they are not persuasive.

In response to Applicant's argument that the "second space does not lie 'between' the alleged base plate and the alleged first space", please note that Figure 2 shows that at least part of the second space is between the base and the first space.

Additionally, please note Hakoziaki shows the second space being below the first space when Figure 1 is seen upside-down.

In response to Applicant's argument regarding Figure 3, please note that Figure 3 is a view from the back, no the front of the connector. Figure 2 is a view from the front of the connector.

In response to Applicant's argument that Hakoziaki does not describe contact terminals arranged "at an interval of space capable of accommodating the partition wall of the first card," please note that it has been held that the recitation that an element is "capable of" performing a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138. In this case, the terminals of Hakoziaki are arranged at an interval of space capable of accommodating an appropriate partition wall of a card.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Felix O. Figueroa whose telephone number is (571) 272-2003. The examiner can normally be reached on Mon.-Fri., 10:00am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on (571) 272-2800 Ext. 33. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for

Art Unit: 2833

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
